

PAYING TOO MUCH ON YOUR POWER?

\$50 FEE

ON YOUR AIR CONDITIONER
INCLUDING A COMPREHENSIVE
REPORT!

An estimated 75% of air conditioning systems are operating inefficiently.

Australian Refrigeration Mechanics Association (ARMA) are committed to reducing greenhouse emissions and supporting Governments in their energy efficiency strategies.

We support only trade qualified Refrigeration and Air Conditioning tradespeople, meaning we only send a qualified person to assess your systems.

Make sure to check that they hold the 'full' Arctick license. This will be your local technician and not a peripheral tradesperson.

A **restricted** licence card holder is not the person who can perform the assessment we are offering.

Inviting your local technician to check your air conditioning systems will help ARMA gather important data on equipment and to advise you if your system is operating as efficiently as it should be.
