

ARMA is currently working on a vetting process to supply members with our **SEAL** above on membership cards.....stay tuned!

National Licensing

Upskilling Cert III in ALL

Refrigerants

Developing Training Packages

Lobbying Government

ARMA is:

- Fighting for a fully licensed trade
- Lobbying governments & regulators
- Working with RTO's
- Building alliances to reduce emissions, improve government credibility, reduce compliance costs, and streamline legislation
- Establishing a Training Group to provide quality across-the-board Certificate III HVACR training, inclusive of OH&S and all refrigerants

Industry

YOUR TRADE! YOUR RIGHTS! YOUR VOICE!

ARMA is a grass roots, industry-led platform for Australia's HVACR tradespeople to be heard by all levels of governments, and industry.

ARMA is committed to establishing a new national industry board from the ground up.

ARMA is your voice to fight for the removal of non-technically competent Cert II Qualifications with the implementation of a new national trade based license for all HVACR tradespeople.

Training Support Services

ARMA is working towards establishing an online training forum for apprentices and trade qualified RAC tradespersons, to enable its members to further increase their technical skills and access online support.

A grass roots solution for Refrigeration and Air Conditioning Representing qualified Tradespeople and Apprentices

ARMA's mission is:

- to be a platform for its members' voices to be heard by government and
- to drive government action to address its members' concerns, including **NATIONAL LICENSING** and the Upskilling of Cert III in ALL REFRIGERANTS!

OUR POINT OF DIFFERENCE

- We are, and always will be, a voice for trade qualified HVACR professionals only.
- Unlike other industry bodies, we're grass roots trades ourselves
- With over 1,000 members, we're already one of Australia's largest HVACR industry bodies – and we've only just started!
